

I would like to express my opposition to any of the proposals outlined in WT Docket No. 02-276. Although these proposals would benefit the parties involved in Auction Event No. 35, they would not be in the public interest.

All the parties participating in Auction Event No. 35 were aware prior to the auction, and hence prior to placing their bids, that the licenses in the auction were subject to further litigation. They bid on them knowing the terms of the auction required they accept this risk, and assume any licenses they won in Auction Event No. 35, at the cost of their bids, should the Commission be successful in the litigation and be able to transfer the licenses to the winning parties.

It is in the public interest that the integrity of government auctions, and the terms of such auctions, be upheld. By allowing successful bidders to "back-out" of their commitments (even before the litigation on the licenses is finalized, as per the terms of the auction) would make a mockery of the integrity of the proceedings.

Furthermore, the United States Government would be unfairly surrendering monetary fees it is fully entitled too. The Government must always remember that's its money is the peoples money. It is a government of, by, and for the people of the United States of America.
